This is all good...

Pull up a chair and watch her design.
Inspiration may strike you too!

Interrupt! As INFJ, she hyper-focuses on
literally everything. So it's totally fine to break the trance.

Suggest **ALL the revisions you want**. It needs to be perfect.

ASAP turnarounds? She'll juggle, prioritize, and deliver
on time, with care.

Talking points

Current events, kids, pets, tech, design, art, music, how you're feeling today (and why), and baseball: "go Jays, go!"

Design flaws

- Tends to overthink with precision (sees a situation from 15 angles and builds an empathy map for each)
- Occasionally stubborn, especially when her heart and gut say "this matters, it's important."
- Believes "I've got this" even when it's fine to ask for help
- Holds herself to high creative standards (not others)

Collaborative | Independent | Strategic

Achieving best results

- Offer meaningful feedback
- Her best work shines when she feels seen and valued
- Trust her design eye... her instincts for design and UX is shaped by years of hands-on experience.
- Learning fuels her growth
- Practice kindness
